MEMORANDUM FOR: A. W. Dulles

SUBJECT

STATSPEC

You thought quite right in that in general it has been Soviet stalling tactics which have slowed down any effort to co-operate in the study of outer space. We do have some agreements that we'll co-operate in the communications and weather fields, but so far these are papers only with no concrete action. I'm afraid this is just another propaganda move.

Dear Pete:

STATSPEC

Now that I have time to read  I happened to see the attached item which undoubtedly you noticed. I thought the shoe was on the other foot and that the Soviet had refused to cooperate with us " in a joint study of universe".
